University of California, Santa Cruz

Expected Graduation: June 2028

Computer Science: Computer Game Design B.S (GPA: 3.85/4.0)

Summary

Passionate undergrad with years of hands-on game development experience, demonstrated through team projects in Unity and Unreal 5. I enjoy creating unique games that players interact with in new ways. I employed unconventional input methods through a couple of games, presenting a game with custom hardware at repeated public showcases.

Experience

[Gameheads Student](#) | Game Designer | Programmer

2022 - Present

- For 4 years I've been working more than 10 hours a week at Gameheads, developing yearly projects in teams of 6-7 devs in an Agile framework, from concept to published vertical slice.
- Lead team ideation to create compelling games with feasible scope, incorporating ideas from all team members
- Uphold design pillars and user experience following playtest observations
- Manage project scope using effort-value judgements, cutting and prioritising features accordingly
- Present weekly progress to board of industry professionals, incorporating critique from board members
- Design and iterate on game mechanics by presenting ideas to teammates and soliciting feedback from playtesters
- Present game demos at yearly Gameheads Student Showcase

Gameheads Projects

[Mailmatta](#)

May 2026 - Present

3D Momentum Based Platformer with a Parry Mechanic

- My challenge: creating character movement that gives the player the feeling of momentum.
- Made using Unreal 5, Blueprint

[SPREE](#)

May 2025 - July 2026

3D Alternative Control Co-op Kart Racer with an Actual Shopping Cart as a Controller

- Built hardware that a pair of players can interact with to control in-game movement, using shopping cart as a base
- In 2026, SPREE showcased at Open Sauce, Superbowl Breakfast, Gameheads Student Day at GDC, STEAM Fest
- Made Kart Racing movement that compliments the custom hardware

[Colorezz](#)

May - Dec 2023

2D Paint Shooter

- Created a game where players balance the task of shooting enemies while painting buildings in the background
- The main challenge: encouraging players to focus on the buildings while the threat of the enemies is more imminent
- Created enemy NPC AI and behaviors

[Pupusa Time](#)

May - Dec 2022

Cooking Rhythm Game

- Implemented motion control input from Joycon to Unity
 - Iterated on challenge of teaching players unique and precise cooking motions
-

Skill Sets

Technical: Unreal Engine | Unity | C# | C++ | C | Perforce | Git | Javascript | Python | Bash | Makefile | HTML

Other: Agile | Scrum | Adobe Photoshop | REAPER | Google Slides & Sheets | Miro | Trello | Slack | Premiere Pro | Figma
